

# Bode SecurSwab Collection Devices

Bode Technology has developed innovative evidence collection systems which integrate the collection, labeling, protection, preservation, transportation, processing and storage of DNA evidence.

## Bode SecurSwab™ & SecurSwab SIT™

The Bode SecurSwab only requires gloves and a Transport Pouch to be a complete collection system. It is designed with a protective tube, barcode labels, integrated desiccants, a plastic barrel over the shaft and a human DNA-free swab. This design provides a simple system to protect and preserve your evidence, simplifies chain-of-custody, ensures the shaft won't break during collection and minimizes contamination.

- A **complete collection system** in one swab – just add gloves and envelope
- **Saves time** while collecting & processing evidence
- Reduces contamination risk and is **free of DNase, RNase & human DNA**
- Improves **evidence integrity**
- Easy-to-use & requires **minimal training**

## Bode SecurSwab DUO-V™

The SecurSwab DUO-V utilizes SecurSwab technology to optimize evidence sample collection in the field.

The SecurSwab DUO-V contains **2 Cotton-tipped Swabs** for either wet/dry collection or 2 swabs of the same sample and integrated desiccants for drying samples and **2 Integrated Desiccants** for quicker drying.
