

Bode Forensic Genealogy Service

More Investigative Leads to Solve More Cases

Bode's Forensic Genealogy Service (FGS) combines DNA analysis with traditional genealogy and familial research to deliver investigative leads in trying to solve or support cases.

NEW: Surname Search

Utilizing information found on the male chromosome and searching public databases, we can develop more investigative leads in situations where traditional forensic genealogy cannot. In using a large collection of databases specific to surnames, ethnicities, and geographical groups, we can develop a list of exact or nearly exact surnames.

Violent Crimes and Unidentified Remains

Bode FGS can be used for violent crimes against individuals or for identifying human remains of deceased individuals.

Power of Genealogy: More Investigative Leads

Bode's FGS team will utilize links between DNA profiles to identify individuals that may be related to an unknown sample. From there, the genealogy team will utilize available records to identify or eliminate potential matches.

Investigators will have direct access to Bode scientists and genealogists to further the investigation and identify likely leads. As genealogists hone in on individuals, investigators can follow leads and assist in identification of specific names.

Mixtures

Bode works with agencies on a case-by-case basis to perform testing on samples containing multiple profiles. Samples are evaluated to determine the chance of success, which depends on factors such as the ratio of each DNA profile in the mixture, the amount of DNA available and the availability of a known sample.

NEW: Bode is Certified by the New York State Department of Health for Forensic Genealogy Services

High Quality Program

Bode FGS is designed to ensure the highest level of quality at all stages of the process.

- Accredited Quantification and Extractions
- Case Evaluation to Consider SNP Testing or Genome Sequencing
- Advanced Surname Searches
- Large Pool of Samples in Multiple Databases
- Board Certified and Experienced Genealogists
- Expedited Confirmation Testing at Our Accredited Lab
- Ongoing Monitoring

How It Works

Bode provides a comprehensive, turnkey solution for our clients. Throughout the process, Bode's scientists and genealogists regularly communicate with investigators to provide updates and collectively determine how to move an investigation forward.
